- CCOIN Token will be sent to the wallet from which the ETH arrived.
- By participating in this fundraiser I agree to the terms and conditions and confirm that I am not a citizen of the USA .

CCOIN TOKEN

CCOIN Token is the token that will allow their holders to pay in online-stores for products or services. This is an ERC20-compliant digital asset on Ethereum, which basically means that **you have full control over your tokens**. Once the set of smart contracts is deployed on the Ethereum blockchain, nobody can modify the code. That is, it lives and autonomously runs on the blockchain.

The minimum contribution amount is set to:

- 0.1 ETH
